Information on surface quality

The surfaces of the products conform to the generally applicable industrial standard. The surface quality may change during the production period. This has no effect on strength, dimensional stability and dimensional accuracy.

The color pigments in the paints used perceptibly react to UV light over the course of time. This does not however in any way affect the technical properties of the products. The product is to be protected against UV radiation to prevent the formation of patches and fading. Changes in color are not a reason for complaint and are not covered by the warranty.

3.4 Mounting data

| Strength class of | 8.8 |
|-------------------|-----|
| screws | |

 Secure the screws against unintentional loosening (e.g. use selflocking screws).

Any further mounting data required can be taken from the product drawing or Section Chapter 4.1 Mechanical connection.

3.5 Transport and storage conditions

| Max. permitted ambient temp. for motor (transport/ storage) | + 80 °C |
|---|---------|
| Min. permitted ambient temp. for motor (transport/ storage) | - 40 °C |
